

Can't Find My Way
Words and music by Bob Telson

We share a certain hunger
A scent we can't ignore
She closes all escape routes
Just looking in your eyes
She's shining like the full moon
No clouds obscure the sky
So why can't I find my way to your door

I never felt sensation
Till she played me like a drum
Hearts brake like cracking glaciers
Beneath the burning sun
I look into the mirror
Don't know what I've become
So why can't I find my way to your door

I will show you
Who you really are she said
Everything will change
Play my double game

She thinks she's got the message
She wears it like a flag
Keep changing rules and limits
She know what's good and bad
Romance is left unfinished
Though you cry out for more
So why can't I find my way to your door

Help me... I can't find my way
